Functional Requirements - Forget Password

As a user, I want to reset my password using the "Forget Password" option so that I can regain access to my account if I forget my password.

Confirmation

1. The user has to enter their registered email address to initiate the password reset process.

2. If the entered email matches an existing account, the system will send a One-Time Password (OTP) to the user's email.

3. The user must enter the received OTP to verify their identity and proceed with setting a new password.

4. If the entered email does not match any existing account, the system will display a warning message indicating that the email is incorrect.

5. The admin shall not be able to use the "Forget Password" option on the login page due to security reasons.

Functional Requirements - Course Editing and Deletion by Instructor

As an instructor, I want to edit and delete the courses I upload so that I can modify the course details or remove a course if necessary.

Confirmation

1. The system shall allow the instructor to edit the title of the courses they have uploaded.

2. The system shall allow the instructor to edit the description of the courses they have uploaded.

3. The system shall allow the instructor to replace or update the videos associated with the course.

4. The system shall allow the instructor to delete the courses they have uploaded.

5. The system shall save all changes made by the instructor and reflect the updated course details immediately.

6. The instructor shall be able to preview the changes before finalizing them.

7. The system shall ensure that only the instructor who uploaded the course can edit or delete it.

8. Upon deleting a course, all associated content (videos, descriptions, etc.) shall be permanently removed from the system.

9. The system shall prompt the instructor with a confirmation message before permanently deleting a course to avoid accidental deletions.
